SKILLS

NodeJS ExpressJS C/C++ ReactJS
REST API MySQL PHP CSS HTML
JavaScript Mongoose BootStrap
OOPs Data Structures and Algorithms

PROJECTS

Hostel Booking App | NodeJS
- A web application to book rooms in hostel using your registration ID.
- It allows you to select any room which is available and then to book it paying via online methods like Card/Debit card, UPI, etc.
- Made by using NodeJS, ExpressJS, RazorPay, MongoDB, etc.

Real-Time Schedule | NodeJS
- Built a web application to develop the live time table and to keep the record of the changes.
- Functionality that allows faculty to change the periods and changes will be reflected on the site.
- Extra features like academic calendar and every change is stored in the database.

NewsApp | ReactJS
- A web application that shows daily news by fetching the data from NewsAPI.
- Different categories are available like general, sports, entertainment, science, etc.
- With some modern features like infinite scrolling.
