As a skilled web developer with experience in Frontend and Backend technologies and a passion for organizing events, I am excited to contribute my problem-solving skills and expertise to your organization. With a track record of delivering successful outcomes through effective teamwork and communication, I am confident in my ability to make a valuable impact on your team.

EDUCATION

Bachelor of Technology in Computer Science
Poornima University, Jaipur
08/2019 - Present

A.V.M.D Institute, Agra
Higher Secondary School, CBSE Board
08/2017 - 03/2019

WORK EXPERIENCE

Web Development & Designing Intern
Sparks Foundation
04/2022 - 05/2022

Tasks
- As the lead developer of a payment integration gateway and its implementation in a Hostel Booking project, I was able to significantly improve the payment process and user experience for students booking hostel rooms.
- We were able to increase the number of successful transactions by 25% and resulting 30% increase in bookings.
- The implementation of the payment gateway led to a marked reduction in transaction failures, increased payment security, and improved payment processing times, thereby optimizing the overall user experience.
- As a full-stack developer, I worked on both the frontend and backend using NodeJS, JavaScript, Bootstrap, RazorPay, and other technologies.
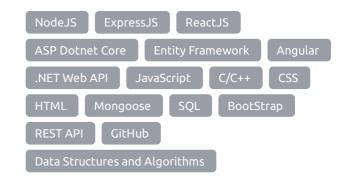

Web Development Intern
• Suven Consultants & Technology Pvt. Ltd
05/2022 - 06/2022

Tasks
- I contributed to a social media web application developed with PHP and MySQL, optimizing its database queries and implementing caching techniques.
- This resulted in a 40% reduction in page load time and a 20% increase in user engagement.
- These enhancements helped to minimize latency, improve responsiveness, and reduce server load, thereby improving the user experience and ultimately increasing customer satisfaction.
- Created a simple calendar as minor project where users can schedule their meetings, task, etc. I was able to provide users with a useful tool for organizing their daily activities.

SKILLS

NodeJS ExpressJS ReactJS
ASP Dotnet Core Entity Framework Angular
.NET Web API JavaScript C/C++ CSS
HTML Mongoose SQL BootStrap
REST API GitHub
Data Structures and Algorithms

PROJECTS

Hostel Booking App | NodeJS
- A web application to book rooms in hostel using your registration ID.
- It allows you to select any room which is available and then to book it by paying via online methods like Card/Debit card, UPI, etc. using RazorPay.
- Finally, by implementing best practices for security and performance, we were able to improve application performance by 30%, ensuring a reliable and secure experience for users.

Real-Time Schedule | NodeJS
- Built a web application to develop the live time table and to keep the record of the changes.
- I was able to provide faculty with a useful tool for organizing their schedules and improving classroom efficiency.
- Additionally, by implementing real-time updates and notifications, we were able to reduce the number of scheduling conflicts by 50%.

E-Commerce| .NET Web API & Angular
- An E-Commerce website where I was able to provide users with a convenient and user-friendly platform for purchasing products online.
- Different categories are available like general, furniture, fashion, electronics, etc.
- Additionally, by implementing a user-friendly interface and allowing admins to manage all products, orders, and stock from a single dashboard, we were able to increase admin productivity by 60%.

ACHIEVEMENTS

Head of the Students' Council 2021-22, Poornima University.

Cleared coding test by Poornima University for advance coding training.

Contributing in Poornima Paathshala (NGO) since 2019.
